

Tool for blind rivet stud

Characteristics / features:

- tool for blind rivet stud
- double bearings of the piston rod
- large distance between bearings
- power reserve by piston \varnothing 40 mm
- applicable for linear units
- ideal for robotic applications
- optionally with automatic feeding system
- ready for process monitoring
- pressure booster with integrated oil reservoir

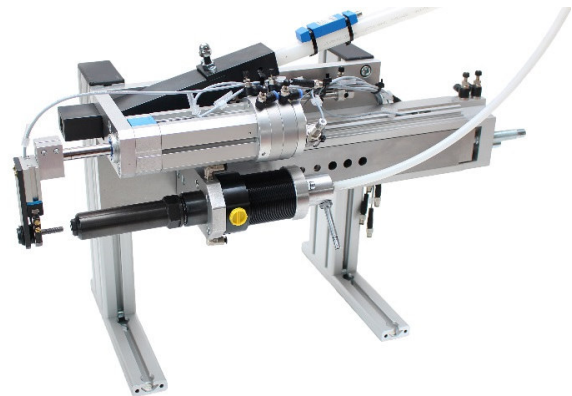

Specifications:

Blind rivet stud	M6	
setting force (6/234 bar)	19	kN *)
setting force (5/305 bar)	26	kN *)
stroke	18	mm
mandrel derivation- \varnothing	-/-	mm
division	M6	mm
sleeves- \varnothing	28	mm
cylinder- \varnothing	65	mm
total length	285	mm
connection, hydraulic	G1/4	
connection, pneumatic	M5	
weight	2,75	kg

*) depending on pressure booster
